

TEMENOS

A FAÇADE THAT REDEFINES PARAMETRIC DESIGN

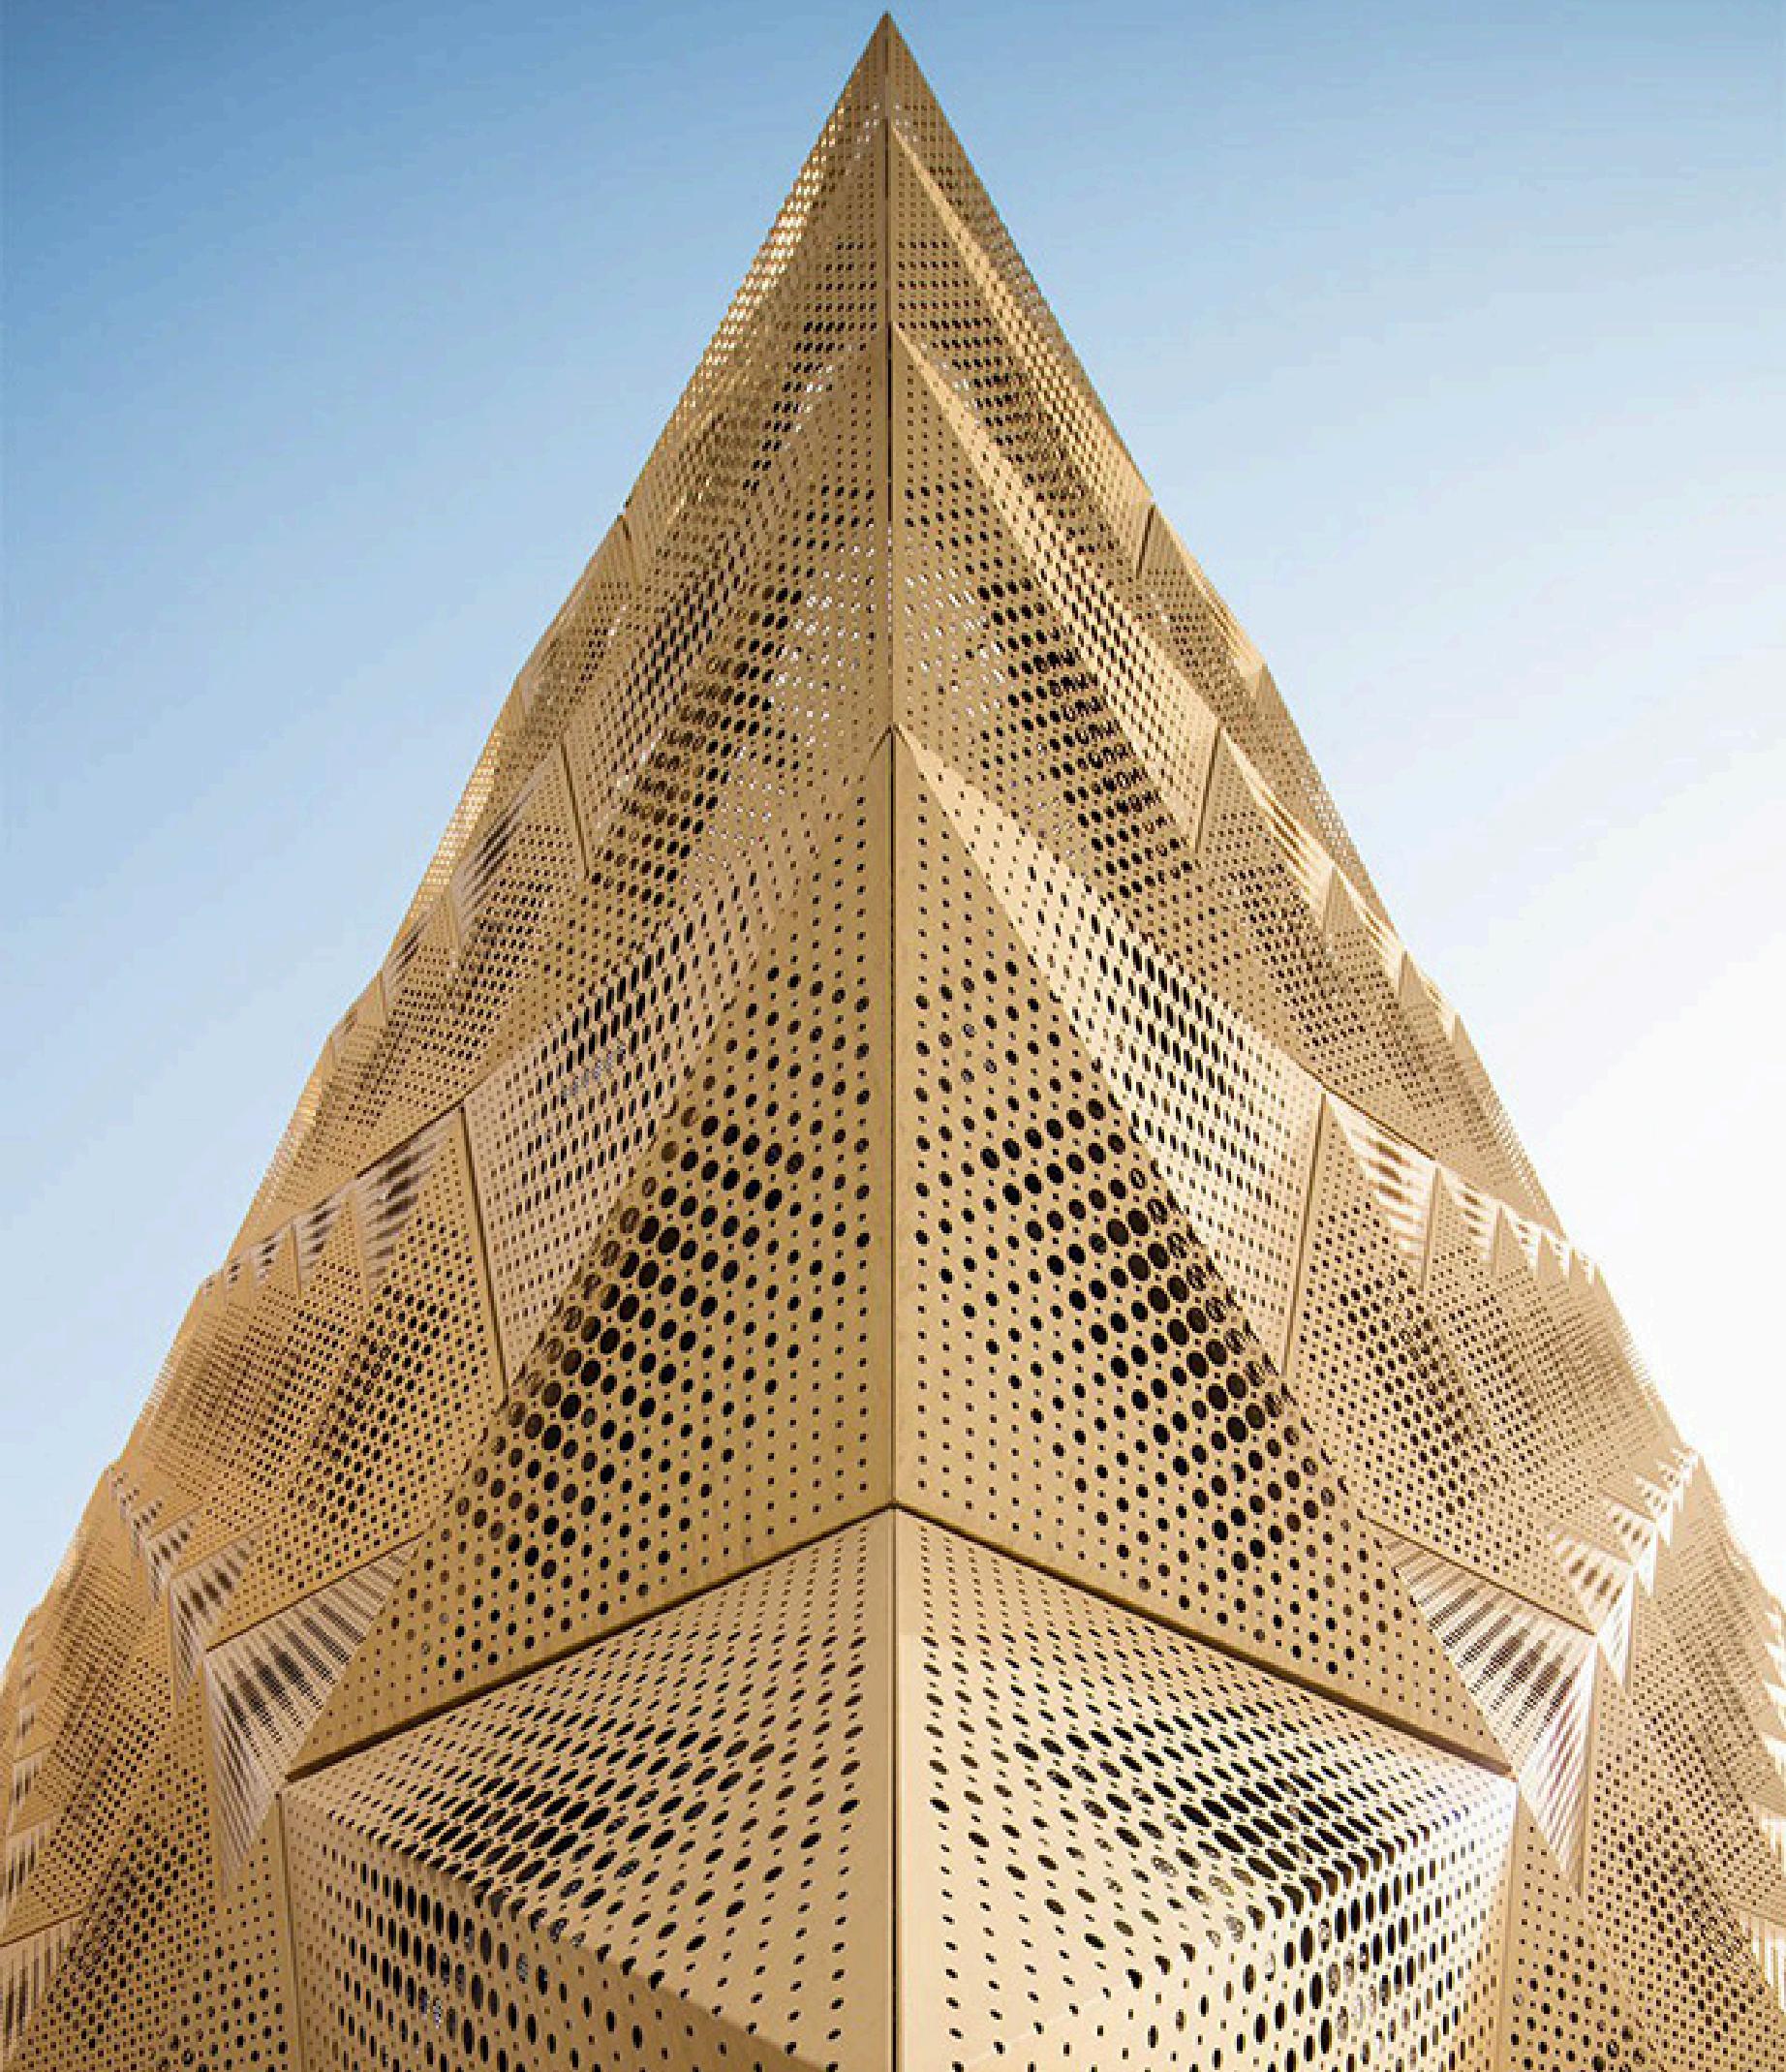

TEMENOS

PROJECT HIGHLIGHT
FEBRUARY 2025

Inspired by sleek origami folds, the façade of this new-age commercial complex in Delhi's Lajpat Nagar features a double skin of perforated aluminium panels. Designed by Studio Lotus and expertly executed in collaboration with Mixx Windows, this dynamic envelope seamlessly blends innovation with functionality, redefining contemporary architectural expression.

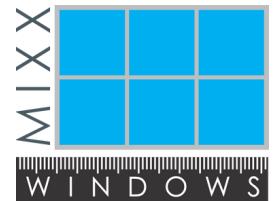

THE PROJECT

Temenos stands as one of the most remarkable parametric façades we have designed. The building itself takes on a strikingly symmetrical yet organic form, with the façade playing a pivotal role in both its aesthetics and sustainability.

Working closely with Studio Lotus, our team ensured that the architectural vision was brought to life through a carefully engineered three-dimensional panel system. With our expertise in façade design and execution, we calculated the weight, mechanical strength, and performance of the perforated elements, ultimately recommending aluminium as the ideal material for this dynamic structure.

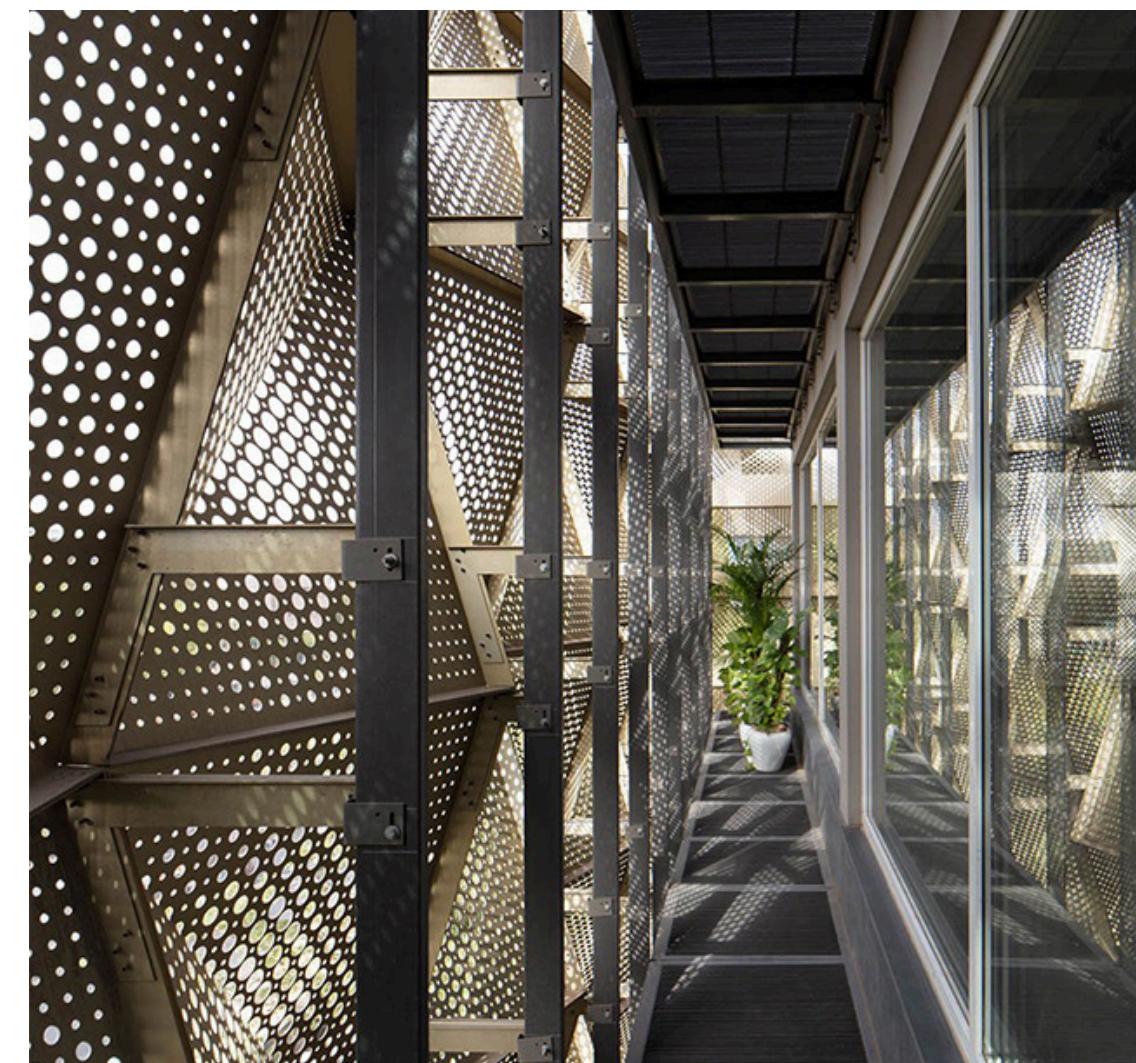

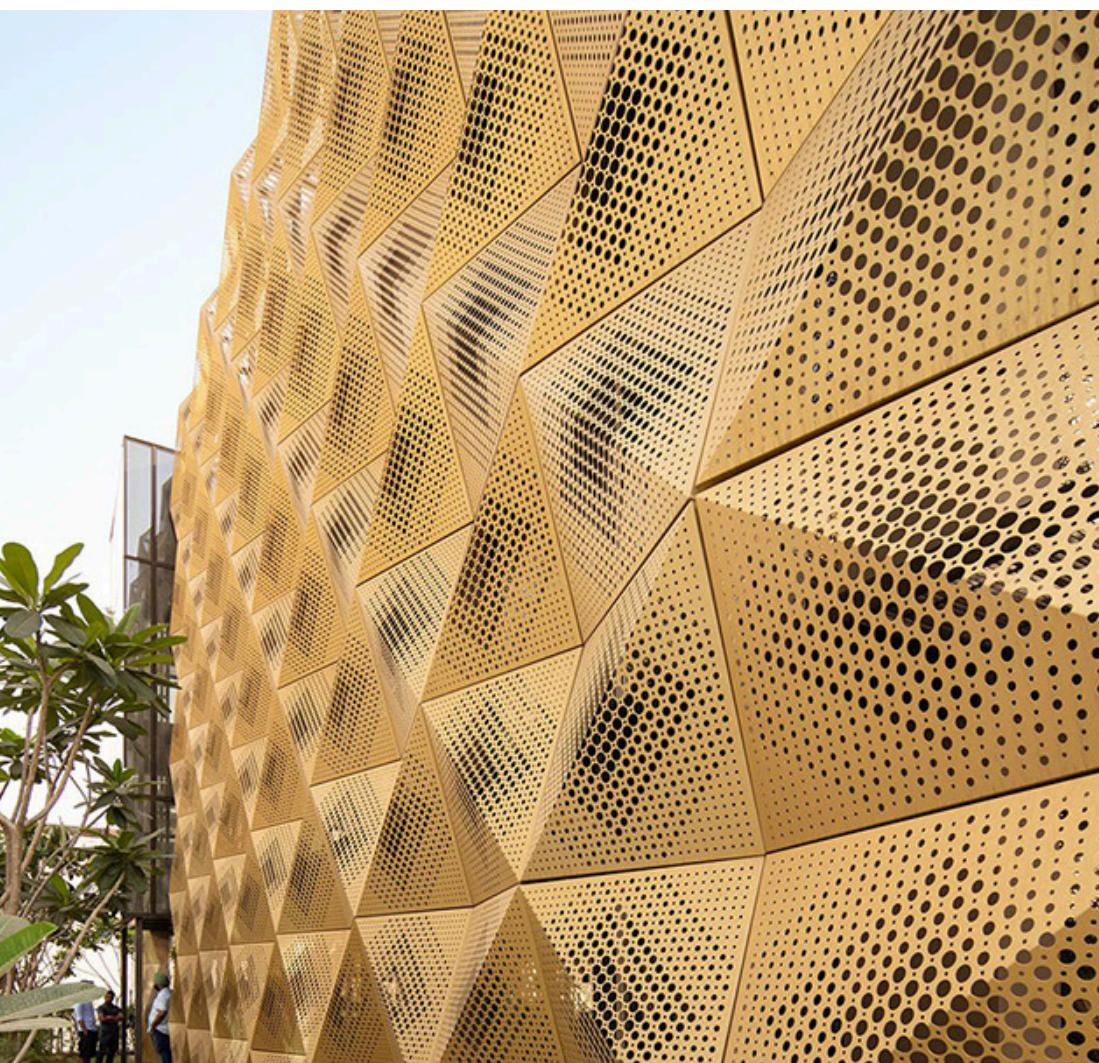

TEMENOS

PROJECT HIGHLIGHT
FEBRUARY 2025

The result? A façade that is not only visually compelling but also enhances the building's overall performance—bringing together innovation, craftsmanship, and sustainability in perfect harmony
